Subject: HB 5225 proposed amendment

Greetings,

I would like to take this opportunity to voice my support for the proposed amendment language to HB 5225 that would eliminate the redundant "Permit to Purchase" requirement for pistols. Before the National Instant Criminal Background Check System was implemented on a Federal level, the Michigan Permit to Purchase served a purpose. However, I now feel that it is a redundant waste of resources and puts an undue burden on both private citizens and police departments. I am of the opinion that the elimination of this requirement is long overdue and will free up police resources that could be better applied elsewhere.

Thank you for your consideration.
